(858) 414-7545  
San Diego, CA

### EXPERIENCE

#### Full Stack Web Developer / Midnight Oil Developers

July 2019-Present, San Diego CA

- Building a MERN Stack web application from the foundation to reflect the needs of the company and the consumer in its UX and functionality
- Utilizing Javascript and React to create an organized front and back end code base
- Implemented MongoDB for the database and used Axios to communicate API calls with the server and database
- Operating in a fast pace ground level startup and having the self sufficiency to ensure the project is on the path to success while working in office and remotely

#### Programmer / Rush Order

January 2019-September 2019, San Jose CA

- Debugging back end Visual Fox Programs and ensuring correct CRUD with databases
- Custom development of VFP programs to integrate clients into EDI systems
- Working closely with clients to meet project expectations while having clear communication

#### Software Engineer Intern / eBay

June 2018-September 2018, San Jose CA

- Working on Buyer Experience My eBay team updating UI/UX using Marko JS
- Debugging and refactoring code base to match company standards
- Integrating back end databases with front end UI for seamless interaction in Kraken

#### IT Administrator / Defib This

January 2018 - June 2018, Santa Cruz CA

- Coordinated directly with CEO and COO to update UI/UX on multiple company websites using front end tools including Javascript, HTML, and CSS
- Troubleshooting employee and customer concerns with website, external software, and hardware issues

#### Software Development / QA Intern / Elevada

July 2017 - October 2017, San Diego CA

- Completed solo project implementing Python, JSON, and API usage to address demand for sample data used in product testing and demonstrations
- Coordinated with remote team using github and slack to communicate project needs
- Documented regression testing and bugs and fixed minor issues in production code
